

Fairy Flame — Modular Lander & Split-Test Blueprint

Reverse-engineered from Nütrops' 19-lander funnel architecture · Built for avatar-matched testing · 2026-07-27

THE THESIS IN ONE PARAGRAPH

Nütrops runs **19 landing pages off one page**. We diffed all 19: **~118 text blocks are byte-for-byte identical on every page** — the entire product, proof, ingredient, and offer spine. Each lander then swaps only its **hero** and **one "why it helps you" reasons section**, rewritten to a single avatar's symptom, and every ad points at the lander that mirrors its own hook. That's two wins at once: **message-match** (the click and the page say the same thing, so the scent never breaks) and **scale** (a new avatar lander is a 20-minute copy-paste, not a new build). This document maps that architecture onto Fairy Flame — a locked spine written in our voice, swap-slots filled per avatar, and a prioritized split-test roadmap to prove the lift and bank the conversion rate.

How to use this: §2 is the page skeleton (what's locked vs. what swaps). §3 is Nütrops' proven pattern. §4 is our fill-in-the-blanks master template. §5 is the test plan — run it top-to-bottom and each test compounds on the last.

1 · Why this boosts conversion rate

MESSAGE-MATCH IS THE LEVER

The #1 reason a warm click bounces is a **scent break** — the ad promised "get your mornings back" and the page opens on a generic product grid. Nütrops removes the break: the ad's hook is the lander's hero. Same words, same avatar, same symptom. The visitor feels "this is exactly what I clicked for" in the first second.

MODULARITY IS THE MULTIPLIER

Because only the top ~1/3 changes, they spin up an avatar-specific page for pennies and run a dedicated ad set into each. More matched pages = more relevance = lower CPA and higher CVR — without rebuilding the store.

WHAT WE MEASURED (NÜTROPS, 19 LANDERS)

Signal	Finding
Shared blocks	~118 identical on ~all 19 pages
Swap zone	Hero + one reasons section (top ~1/3)
Molds in use	2 — benefit page (17) + advertorial story (Sherry)
Ad→lander	1:1 — each hook has its own matched page

Mechanism

Identical everywhere; only the symptom changes

2 · Anatomy of the page — locked vs. swap

Top to bottom. Two blocks at the top carry the avatar; everything below is a shared spine you build once.

☐ Swap per avatar ☐ Locked (build once, reuse on every lander)

1 · Hero

SWAP PER AVATAR

Avatar headline + subhead + hero CTA. Mirrors the ad hook word-for-word. *This is the single highest-leverage block on the page.*

2 · "Why it helps YOU" reasons

SWAP PER AVATAR

3–4 reasons written to this avatar's specific symptoms (e.g. mom: to-do-list blanks, snapping, 3pm crash). Same actives, pointed at her pain.

3 · Mechanism / how it works

LOCKED

The state-shift explanation, the actives, "not stimulation, not sedation." Identical on every lander.

4 · Benefit trio + differentiator

LOCKED

The 3 core benefit cards + "legal, lab-verified, real doses not mystery blends."

5 · Ritual / format / taste

LOCKED

One flame gummy a day, pre-measured, no prep. The easy-to-keep-habit block.

6 · Social proof module

LOCKED

Testimonials + review/rating bar + press. **Fairy Flame: real proof only** (Jordan T., Maya S.) until counts exist.

7 · Ingredients / lab / FAQ

LOCKED

Full formula, COA, GMP, allergen/vegan facts, objection-handling FAQ.

8 · Offer + guarantee

LOCKED

1 / 3 / 6-pouch pricing, 3-pouch default, 60-day money-back, free discreet shipping.

9 · Footer + disclaimer

LOCKED

Compliance disclaimer, links, contact.

Rule of thumb: if a block states a *fact about the product* → LOCKED. If it names a *symptom, identity, or feeling* → SWAP. That single line tells you which zone anything belongs in.

3 • Nütrops' proven swap matrix

The exact hero + reasons Nütrops swaps per avatar — proof the model works before we copy it. Everything below the reasons section is the shared spine (mushrooms, fruiting-body education, lab, offer, 250k-members proof, footer).

Lander	Avatar	Hero hook (swapped)	The one reframed section
/focus	Core brain-fog	"Brain decay is real. Slow it down with superfood mushrooms"	Lion's Mane evidence / processing-speed proof
/focus-pdp	Focus + authority	"Fuel Your Focus, Naturally"	Adds a doctor (Dr. Felice Chan, TCM) + 401(k) "invest in your brain" metaphor
/stimulants	Caffeine-crash	"THAT 3PM CRASH? Focus meds weren't built for the whole day"	Sustained energy vs. spike-and-crash
/working-moms	Tired mom	"5 Reasons the Busiest Moms Are Loving Nütrops"	4 mom reasons: stress ("stop hiding in the bathroom"), to-do-list blanks, caffeine-free energy, gut/"backed up"
/caffeine-quitter	Quitting coffee	"It's Not You, It's Caffeine. Break up with your afternoon slump"	The "Tired → Coffee → Still Tired" cycle
/neural-network	Longevity	"Your Brain Loses 85,000 Neurons Every Day. 7 Ways to Fight Back"	Compound-interest / sun-damage / "sprint vs. endurance"
/alcohol	Wine-fog	"You don't have to give up happy hour — just give your brain support"	"Blue Zone ritual" reframe
/gracefully-aging-sherry	Aging grandma	"How Nütrops Helps Me Be the Grandma Who's Really There — Sherry L."	Different mold — full first-person advertorial story, dated, editorial

Two molds, not one. 8 of 9 are the **benefit page** above. One (Sherry) is an **advertorial story** — a dated, first-person editorial article ("in her words") that sells through narrative, not feature cards. We should build both and test them head-to-head per avatar (§5, Test 2).

4 • The Fairy Flame master template

Build the **LOCKED** spine once, in our voice. Then duplicate the page and fill the **SWAP** slots per avatar. Copy below is a working first draft — tighten in the editor.

4.1 The LOCKED spine (build once, on every lander)

MECHANISM It's not a push. It's not a numb-out. It's a reset.

Coffee pushes a tired brain harder. Alcohol switches it off for a night. Fairy Flame does neither — a legal magic-mushroom microdose that gently shifts your *state* back to curious, clear, and present. Supported by lion's mane (focus), cordyceps (clean energy), and ashwagandha (a steadier stress baseline). One flame-shaped gummy a day.

DIFFERENTIATOR Legal. Lab-verified. Real doses — no mystery blends.

Third-party COA on every batch, made in a US GMP facility, vegan fruit-pectin (no gelatin). Every order ships with a dosing guide and the lab report for that batch.

RITUAL One gummy, pre-measured, no prep, no guessing — the four-phase arc: **Days 1–7** lighter mornings · **8–21** baseline resets, less reactive · **22–45** sustained clarity · **45+** it's just who you are again. (This arc is why the 3-pouch/90-gummy bundle is the default — it covers the full reset.)

OFFER + GUARANTEE 1 pouch \$69 · **3-pouch \$189 (default, save \$18 + free gift)** · 6-pouch \$329 (best value, save \$85). Free discreet US shipping. **60-day money-back — full refund, no hoops, no hassle.**

PROOF — REAL ONLY Use only what's true today: Jordan T. — *"I feel like myself again — focused, creative, and calm."* · Maya S. — *"the first thing that's helped my anxiety without making me feel sedated or disconnected."* **Do not add** review counts, star ratings, "%recommend," or an As-Seen-In bar until real data exists (offer.md open gap). This is a locked block with a live placeholder — fill when data lands.

Banned words on every lander: **wellness, journey, holistic**. In ads, actives stay general ("microdose gummies"); the lander may name lion's mane / cordyceps / ashwagandha.

4.2 The SWAP slots — filled per avatar

Each avatar gets a matched lander. Hero mirrors the ad; the three reasons point our same actives at her symptoms. Slug is the proposed lander path — wire the matching ad set straight to it.

Burned-out mom (primary)

/mom mold: Benefit page

Matched ad hook "Snapping at everyone, then feeling guilty? Fog by 10am no matter how you slept?"

HERO HEADLINE The mom your family remembers — without the fog.
One small gummy a day. Not a push like coffee, not a numb-out like wine — a gentle reset back to you.

"WHY IT HELPS YOU" — 3 REASONS

- **The mid-sentence blanks & the mental fog** — lion's mane supports the focus to actually finish a thought (and the to-do list).
- **The snap-then-guilt loop** — ashwagandha steadies the stress baseline so you're not running hot all day.
- **The 3pm crash** — cordyceps gives clean energy with no caffeine spike and no crash.

Perimenopause / hormonal 45-55

/change mold: Benefit page

Matched ad hook "Perimenopause might be behind the fog, the mood swings, the 3am wake-ups."

HERO HEADLINE The brain fog isn't just "getting older." It's a state you can reset.
A legal microdose gummy for the hormone-fueled fog nobody warned you about.

"WHY IT HELPS YOU" — 3 REASONS

- **Hormone-fueled fog & mood swings** — a state-shift back to clear and even, not medicated-flat.
- **Energy that fell off a cliff** — cordyceps for steady, caffeine-free energy through the afternoon.
- **The 3am wake-ups** — ashwagandha helps settle an overheated stress response.

Sober-ritual seeker

/instead-of-wine

mold: Benefit page — also test advertorial story

Matched ad hook

"Wine isn't calming you — it's numbing you. There's a version of the evening you actually remember."

HERO HEADLINE The evening wind-down that doesn't cost you tomorrow.

Trade the glass for one flame gummy — calm and present, no hangover, no fog the next morning.

"WHY IT HELPS YOU" — 3 REASONS

- **You want the edge off, not the lights off** — a gentle state-shift, not a sedative.
- **No next-day fog** — wake up clear instead of paying for last night.
- **A ritual you can keep** — one gummy, same time each night, no bottle to finish.

Numbed med-user

/without-the-numb

mold: Benefit page

Matched ad hook

"Helped my anxiety without making me feel sedated or disconnected." (Maya S.)

HERO HEADLINE Calmer — without feeling switched off.

For anyone who traded the anxiety for feeling nothing at all. This gives the calm back without the flat.

"WHY IT HELPS YOU" — 3 REASONS

- **Calm without the flat** — a state-shift that leaves you feeling *like yourself*, not muted.
- **Real doses, on the label** — legal, lab-verified COA every batch, no mystery blend.
- **60-day money-back** — try it against how you feel now, full refund if it's not it.

5 • The split-test roadmap

Run top to bottom — each test builds on the winner of the last. One variable at a time. Primary metric is **landing-page conversion rate (initiate-checkout or purchase / unique visitors)**; watch AOV and CPA as guardrails so a CVR win that tanks AOV doesn't fool you. Call a test only at a pre-set sample (rule of thumb: ~200+ conversions per variant, or significance in your testing tool).

0. Message-match — matched lander vs. generic PDP

RUN FIRST

Hypothesis	An avatar-matched hero+reasons beats one generic product page for warm ad traffic.
Control (A)	All ad sets → one generic PDP (today's default).
Variant (B)	Each avatar's ad set → its matched lander (§4.2), hero mirroring the ad hook.
Primary metric	Lander CVR per avatar cohort.
Watch / note	This is the whole thesis — prove it before anything else. Start with the mom ad set (biggest volume) so you hit significance fastest.

1. Mold — benefit page vs. advertorial story

P1

Hypothesis	For high-emotion avatars, a first-person story (our founder / a "Sherry") converts better than the feature-card page.
Control (A)	Winning benefit-page lander from Test 0.
Variant (B)	Same avatar, advertorial-story mold (dated, first-person, narrative) — e.g. the founder story for sober-ritual / numbed-med-user.
Primary metric	Lander CVR; also scroll-depth / time-on-page.
Watch / note	Test on the avatars where trust > features first (numbed-med-user, sober-ritual). Reuse founder-story.md.

2. Hero hook — which promise pulls

P1

Hypothesis	The hero line is the highest-leverage block; a sharper promise lifts CVR without touching the rest.
Control (A)	Winning lander's current hero.
Variant (B)	Same page, 1–2 alternate hero headlines (e.g. identity "the mom your family remembers" vs. symptom "fog gone by 10am").
Primary metric	Lander CVR; click-to-scroll past hero.
Watch / note	Feed hero variants straight from the winning ad hooks — the ad already A/B-tested them in-feed.

3. Reasons framing — symptom vs. identity

P2

Hypothesis	Ordering/framing the 3 reasons around identity ("get her back") beats a symptom checklist.
Control (A)	Symptom-led reasons (§4.2 as written).
Variant (B)	Identity/outcome-led reasons for the same avatar.
Primary metric	Lander CVR; add-to-cart rate.
Watch / note	Cheap to run once Tests 0–2 have set the page. Keep everything else fixed.

4. Offer & guarantee presentation

P3

Hypothesis	Leading the offer block with the 60-day guarantee / default 3-pouch framing lifts AOV without hurting CVR.
Control (A)	Current offer block (3-pouch default).
Variant (B)	Guarantee-forward layout, or bundle-savings emphasized differently.
Primary metric	AOV and revenue-per-visitor (not just CVR).
Watch / note	Do not test fabricated proof (review counts, ratings) — blocked until real data (offer.md). Revisit when data lands.

SEQUENCING LOGIC

Test 0 proves matched pages beat a generic PDP — the foundation. Test 1 finds the right *modal* per avatar. Tests 2–3 sharpen the swap zone (hero + reasons) that does the persuading. Test 4 optimizes the money block last, on AOV. Only ever change one zone at a time so every win is attributable and stackable.

6 • Build checklist

- **Build the locked spine once** (§4.1) as a reusable section/template block — mechanism, differentiator, ritual, proof (real-only), ingredients/FAQ, offer, footer.
- **Create the mom lander first** (/mom) — biggest ad volume, fastest to significance.
- **Wire ad set** → **matched lander 1:1**, hero text = ad hook text (message-match).
- **Duplicate per avatar** (perimenopause, sober-ritual, numbed-med-user), swapping only hero + reasons.
- **Stand up the advertorial-story variant** from founder-story.md for Test 1.
- **Instrument CVR + AOV + CPA** per lander/cohort before launching Test 0.
- **Keep a real-proof backlog** — the moment review/rating data exists, unlock the proof block and add Test 4b.

Source: structural diff of 19 live Nütrops landers (nutrops.co/pages/*) pulled 2026-07-27 — ~118 shared text blocks vs. swapped hero+reasons per page. Fairy Flame product facts per products/fairy-flame/offer.md (proof constraints respected: only Jordan T. and Maya S. testimonials used; review counts/ratings excluded pending real data). Companion: products/fairy-flame/ads/nutrops-winning-ad-teardown.pdf.
