

Fairy Flame — Media Buyer Dossier

Everything we've built: the mandate, the avatar, the angles, the scripts, the offer, the launch plan | brand: liitt · store: liitt.co · channel: Meta · 2026-08-18

READ THIS FIRST

You're taking over Meta paid social for **Fairy Flame** (brand: liitt) — a functional-mushroom mood & focus gummy for burned-out women 40–55. **This is a deliberate fresh start.** The product already sells — but earlier campaigns leaned on aggressive "microdosing / magic mushroom" language and **burned through several ad accounts**. Demand is proven; the *approach* wasn't durable. **Your mission: crack the "vanilla code"** — a compliant, functional-mushroom creative system that converts as well as the aggressive version did, on accounts that **don't get banned**, and that ports cleanly to TikTok Shop and Google later. The good news: the entire creative system below was built compliant-first for exactly this. This dossier is everything — the research, the angles, the scripts, the offer, and the plan.

1 · The mandate — cracking the vanilla code

WHERE WE'VE BEEN

Prior campaigns proved the demand is real — sales were solid. But they ran on **aggressive angles** (explicit "microdosing," "magic mushrooms," psychedelic framing) that platforms punish. The result: **multiple burned ad accounts**, a restart tax every time, and zero long-term compounding. Good revenue, fragile foundation.

WHERE WE'RE GOING

A **clean, durable, compliant** creative system — positioned as a **functional-mushroom mood & focus gummy** (lion's mane, cordyceps, ashwagandha) — that survives long-term on Meta and **ports to TikTok Shop and Google**, which are stricter still. Compliance here isn't a tax; it's the moat: durable accounts compound pixel

YOUR NORTH STAR

Find the compliant creative that converts **as well as the grey-hat version did** — and keeps the account alive. The emotion stays; the risky claims go.

THE RULES THAT KEEP US ALIVE

- **Functional-mushroom / mood & focus** framing only. No "magic," "microdose," "psychedelic," or trip language on these channels.
- **Symptom language only** — never a medical condition or a treatment/cure claim.
- **Actives stay general** in ads ("mushroom gummies"); the page may name lion's mane / cordyceps / ashwagandha.

data, avoid the restart tax, and unlock channels the aggressive version can never touch.

- **Real proof only** — Jordan T. & Maya S. No review counts / ratings / As-Seen-In until real data exists.
- **Banned words:** wellness, journey, holistic. Voice: warm, premium, cinematic — not stoner culture.

Why this is winnable: the deepest converting emotion — "I don't recognize myself / I feel like myself again" — is entirely compliant (it's about *feelings*, not claims). The whole copy bank and all 10 scripts were written first-person, symptom-only, **specifically to clear review**. We're not inventing a weaker message — we're keeping the emotional core and dropping the language that got us banned.

2 · The product & offer

WHAT IT IS

Fairy Flame Gummies — a pouch of 30 flame-shaped gummies, one a day, built on functional mushrooms + adaptogens: lion's mane (focus), cordyceps (clean energy), ashwagandha (steadier stress baseline). Positioned as a **daily reset**: *not a push like coffee, not a numb-out like wine*. Third-party COA in every pouch.

THE RESULT ARC (SELL THE TIMELINE)

- **Days 1–7:** lighter mornings
- **Days 8–21:** baseline resets, less reactive
- **Days 22–45:** sustained clarity
- **Day 45+:** "I feel like myself again"

The 90-gummy 3-pouch covers the full arc — the reason it's the default cart.

OFFER

Tier	Price	Note
1 pouch	\$69	\$2.30/gummy
3 pouch	\$189	default · +free gift
6 pouch	\$329	best value · +3 gifts

Guarantee: 60-day money-back, no hoops.
Shipping: free, discreet, US-only. USA-made, GMP.
Every order: dosing guide + lab COA.
Differentiator: legal, lab-verified, real doses — not mystery blends.

3 · The avatar (deep research)

Research base: live Reddit VoC mining across r/Menopause, r/workingmoms, r/AskWomenOver40, r/adhdwomen and adjacent (2026-07). Everything below is her **exact language** — use it verbatim in copy.

THE CALL — THE MONSTER MARKET

Women 40–55, high-functioning, "done everything right" (therapy, clean eating, supplements, HRT/SSRIs) — and still not herself. Fog by 10am, snapping then guilt, 3am wake-ups, wine as the broken cope, doesn't recognize herself in old photos.

THE DEEPEST EMOTION (THE CONVERTING ONE)

Identity loss witnessed by family. "I used to be X, I don't recognize myself, and my spouse/kids are watching it happen." That single structure repeats across every sub.

THE AFTER-STATE = OUR EXACT PROMISE

"I feel like myself again." Her words for the win: singing again, laughing at his jokes, patience back, "someone I haven't been in years."

SIZING & SOPHISTICATION

- **Market size:** 9/10 — same language across huge subs, not just niche.
- **TAM:** ~33M US women 40–55; ~3M+ "flat and actively seeking."
- **Sophistication:** Level 2 in the mass market — she knows she's not herself, doesn't know this category. **Ads speak Level 2 → introduce the mechanism as a discovery.**

VERBATIM QUOTE BANK (THE WORDS THAT CONVERT)

- "Sometimes I look at photos of myself before kids, and I honestly don't recognize her. I miss her." — WFH mom
- "I feel like I'm on a merry go round that won't stop spinning." — 48F
- "[SSRIs] made me more tired, moody... a lot of brain fog, and overall not enjoying life the way I'm supposed to."
- "My wife thinks I'm funny again, and I'm not embarrassed that my kids have to see me shriveled up with sadness."
- "I feel like myself again. I find myself singing out loud... I'm someone I haven't been for years." — the after-state, in her words

THE FOUR AVATARS, RANKED (START ON THE MONSTER)

Avatar	Size / readiness	Our edge
 Burned-out 40s mom START HERE	10–20x / medium (Level 2)	Owens the deepest emotion (identity loss witnessed by family). All 10 scripts + copy bank target her.
Numbed-out med user	Very large / high	Promise is "calm without being sedated" — their #1 stated wound (Maya S.).
Sober ritual-seeker	Large / medium-high	"Replace the liquid in the glass, keep the ritual." White space.
Blocked researcher	Medium / highest	Legal, COA, pre-measured removes every blocker — most sales-ready of all.

Comparison-shoppers & big-spenders aren't separate avatars — they're *stages* the above pass through; their price anchors (\$600+ ketamine, \$3k regimens) and "what's actually in it?" COA demand feed our proof/offer sections.

4 · The angle system

16 candidate angles → **top 10**, built from her researched language, grouped under **three spokesperson archetypes**. Those archetypes are your **ad-set angle families** (§10). Every angle avoids banned words and keeps actives general by design.

THE THREE ANGLE FAMILIES (= YOUR AD SETS)

STORY — Been-There Mom, 48F

Her own voice; identity & emotional-story angles. The emotional core.

NURSE — Women's-Health Nurse, 52F

Authority/education; red-flags, shocking-stat, root-cause angles.

FOUNDER — Founder, 38M

Trust; origin story + ingredient-expose / COA angles.

#	Pattern	Hook (top 10)	Family
1	Emotional story	"I looked at a photo from before kids... and I didn't recognize her."	STORY
2	Contrarian	"That glass of wine isn't calming you down."	STORY
3	Testimonial / result	"Two weeks of these little gummies and my husband asked what changed."	STORY
4	Identity question	"Open a photo of yourself from ten years ago. When did you stop recognizing her?"	STORY
5	Red-flag / signs	"3 signs you're not just tired — your brain is running on empty."	NURSE
6	Authority / root-cause	"Why 'take more walks' is the worst advice given to exhausted women."	NURSE
7	Shocking stat	"Most women's anxiety peaks between 45 and 55. Nobody tells you that."	NURSE
8	Contrarian	"Stop using coffee to fix your brain fog. It's making it worse."	NURSE
9	Founder origin	"The doctors told me: 'We only brought back one body.'"	FOUNDER
10	Ingredient expose	"Do you know what's in those gas-station mushroom gummies? Neither does anyone else."	FOUNDER

Each angle is matched to a proven swipe formula (e.g. #1 → Farmer's Dog "cactus" emotional arc; #5 → Ryze red-flags; #9 → Farmer's Dog founder film). We're pouring her language into structures that already went viral in DR — not guessing at format. Full matching table in `scripts/00-angle-matching.md`.

5 • The scripts (10, approved)

Ten VSL scripts, one per top angle, all approved and compliance-checked. Videos are in production; you'll launch them as they land. Each follows the same proven arc.

THE UNIVERSAL VSL STRUCTURE (EVERY SCRIPT)

1 • Hook	Her symptom or the identity gut-punch, in her words (first 3 sec = everything).
2 • Problem	The slow disappearing — fog, snapping, 3am, wine/coffee as broken copes.
3 • Failed solutions	Therapy, supplements, "take more walks" — disqualify the conventional fixes.
4 • Discovery	The mechanism introduced as a discovery (legal, USA-made, COA in every pouch).
5 • Transformation	The day 7 → 21 → 45 timeline; family notices ("you've been singing again").
6 • Soft CTA	60-day guarantee, no hoops. No hard sell — one person talking.

#	Script	Spokesperson	Proven formula (source virality)
01	The Photo (before kids)	Mom 48F	Farmer's Dog "cactus" — emotional arc (107k)
02	3 Signs Running on Empty	Nurse 52F	Ryze blood-sugar red-flags (62M)
03	Husband Asked What Changed	Mom 48F	Jones Rd balm + Ryze timeline (34M / 86M)
04	One Body (founder story)	Founder 38M	Farmer's Dog founder film
05	Wine Isn't Calming You	Mom 48F	Ryze red-flags (contrarian)
06	Photo Ten Years Ago	Mom 48F	Mushroom-coffee prostate (48M)
07	Take More Walks	Nurse 52F	Primal Queen hysterectomy (13M)
08	Anxiety Peaks 45–55	Nurse 52F	Primal Queen hysterectomy (13M)
09	Stop Coffee for Fog	Nurse 52F	Ryze red-flags + timeline
10	Gas-Station Gummies	Founder 38M	Farmer's Dog founder + Pestie trust close

EVERY SCRIPT PASSES A COMPLIANCE-FIRST QUALITY GATE
One core idea · Flesch-Kincaid ~5–6 (plain, punchy) · emotional arc fear→hope→belief→action · avatar language pulled from the quote bank · formula fidelity to the matched swipe · word rules: no banned words, "mushroom gummies" only, no invented proof, first-person symptom language (no condition names, no cure claims) · "say-it-out-loud" test (reads as one person talking, zero ad-speak). This is the gate that keeps the vanilla version alive.

6 • The copy bank (ad test kit)

8 primary texts + 15 headlines + 3 descriptions, each mapped to a VSL. Built first-person / symptom-only to dodge rejection triggers. Copy-bank IDs bake into ad names so a winning ad in Triple Whale points straight back to the exact video + PT + headline.

PRIMARY TEXTS (PAIRED TO SCRIPTS)

ID	Angle	VSL
PT-01	"The Photo" (identity)	01
PT-02	"3 Signs" (nurse)	02
PT-03	"What Changed?" (testimonial)	03
PT-04	"Wine O'Clock"	05
PT-05	"45–55"	08
PT-06	"Stop the Coffee"	09
PT-07	"Gas-Station Gummies"	10
PT-08	Short punch (universal)	—

HEADLINES (CONTROL + ANGLE-FIT)

- **Controls (every set):** "Feel Like Yourself Again" (H-01)
· "60 Days. Full Refund. No Hoops." (H-13)
- "Not a Push. Not a Numb. A Reset." (H-03)
- "You've Been Singing Again" (H-04)
- "The Fog Isn't Forever" (H-06)
- "Calm Nights, Without the Wine" (H-07)
- "A Lab Report in Every Pouch" (H-11)
- "What 20 Years of Nursing Taught Me" (H-15)

15 headlines total; 3 descriptions (e.g. "Lab-tested · 60-day guarantee · Ships discreetly").

7 • The numbers you manage to

Metric	Target	Stretch
Blended AOV	\$120+	—
Target CPA	<\$45	<\$35
MER (blended ROAS)	2.0+	2.5+
Default cart	\$189 (3-pouch)	+~\$17 bump

CPA is measured against the \$189 default cart, so there's real headroom. Watch AOV as a guardrail on any test.

POST-PURCHASE PATH (WHERE LTV IS MADE)

- Order bump (~\$17) → OTO1 40%-off 2-pouch (~\$83) → downsell 3-pouch (~\$117)
- Day-21 replenish · cross-mood sampler · Day-60 "Glow" invite

Upsell prices are placeholders pending confirmation.

Scoreboard: a purchase under ~\$45 CPA at ~\$120 AOV is a ~2.6× day-one return before upsells — the launch bar. Durable, compliant accounts compound this over time (the whole point of the pivot).

8 • The competitor model (Nütrops)

Our proof that the compliant version wins: **Nütrops** (a Grüns mushroom-gummy brand) runs the exact vanilla positioning we're moving to — and scales hard. Full teardown in §12.

What they do	Your takeaway
Locked-hook DCO engine	Lock one winning copy line, run it across dozens of cheap refreshed videos. The copy is the asset. One hook ran 56 ads / 7+ weeks.
Longevity = winner signal	Spend is hidden; a 45–52-day-live ad on a pruning account is proven. That's how our swipe file is ranked.
One matched page per avatar	21 landers off one template; only hero + reasons swap. Ad hook = page hero (message-match). We copy this on liitt.co.
Compliant & durable	Zero psychoactive language — pure functional-mushroom, focus/mood/energy. Proof the vanilla lane scales without the ban risk.

Validation: their winning phrases ("running on empty," "feel like myself again," "not more caffeine — a reset") are nearly word-for-word our copy bank. Same avatar, same emotion, compliant execution — already proven in-market.

9 • Funnel, tracking & naming

All traffic → the **liitt.co** store. Meta ad destination: `https://liitt.co/` (matched page per avatar). Clean, direct funnel — no gateway between ad and product page.

NAMING TAXONOMY

Campaign FF_PUR_TOF_2026-08_v1 ↳ Ad Set
STORY_BROAD-W40-55 ↳ Ad VSL02_UGC-
car_PT02_H15

{brand}_{objective}_{funnel}_{yyyy-mm}_{ver} ·
{anglefamily}_{audience} · {vsl}_{creative}_{PT}_{HL}. Angle families =
STORY / NURSE / FOUNDER (the §4 spokespeople).

TRIPLE WHALE UTM (PASTE IN AD → TRACKING → URL PARAMETERS)

```
utm_medium=cpc&utm_source=facebook&utm_campaign=
{{campaign.name}}&utm_content={{adset.id}}&utm_term=
{{ad.id}}
```

TW attributes on IDs and resolves to names via the Meta integration.
Pre-flight: Meta pixel + Triple Pixel live on liitt.co; Meta connected in
TW; one test click resolves. Keep `launch-tracker.csv` as the
single source of truth.

10 · The launch & test plan

One variable per test. Primary metric = CPA at target AOV; diagnose with CTR / hook-rate / CVR / AOV.

0 Phase 0 — Static message-match test (this week, while VSLs render)

- One ad set, Avatar 1, broad women 40–55. Load the **6 swipe-file statics** (one per creative stage) → matched page.
- Learn which creative stage pulls + whether matched pages beat a generic PDP — cheap, before the expensive video spend.

1 Phase 1 — VSL angle-family test (as videos land)

3 ad sets = the 3 spokesperson families; 2 primary texts × 2 headlines each; H-01 & H-13 as controls in every set:

Ad set	Family	Primary texts	Headlines	Scripts
AS-1	STORY (mom)	PT-01, PT-03	H-04, H-09 + ctrls	01, 03, 05, 06
AS-2	NURSE (education)	PT-02, PT-05	H-08, H-15 + ctrls	02, 07, 08, 09
AS-3	FOUNDER (trust)	PT-07, PT-08	H-11, H-03 + ctrls	04, 10

Winning family → scale that VSL's variations; log results to the manifest performance section.

2 Phase 2 — Scale & expand

- Scale winners; run the liitt.co page split-test (matched vs. generic first).
- Expand to Avatar 2 (numbed med-user), then sober-ritual, each with its own matched page + creative.
- Refresh creative every 3–7 days against the winning locked hook (Nütrops cadence).

DECISION RULES

- **Kill** what can't approach target CPA after $\approx 1\text{--}2\times$ target CPA in spend with no purchase signal.
- **Scale** what beats target CPA at protected AOV — duplicate/raise budget on the winner.
- **Diagnose:** low hook-rate → first-3s/creative; good CTR + bad CVR → page/offer; good CVR + low AOV → bump/bundle.
- **Compliance is a launch gate** — anything drifting toward "magic/microdose/psychoactive" or a condition claim doesn't ship. Protecting the account is job #1.

11 · The future creative flywheel (context, not your job yet)

Separately, we're standing up a **TikTok Shop + affiliate-creator program**. You don't run it — but it matters to you because it will become **an endless supply of creative, pre-proven by social**: affiliate creators post native UGC, the winners (by GMV) get handed back to you to run as paid Meta ads. Over time your best-performing Meta hooks also

brief the creators. One creative flywheel, feeding your paid account for free. For now it's just being set up — flagged so you know where the pipeline of fresh, proven creative is coming from.

12 · Asset index

Asset	What's in it
nutrops-winning-ad-teardown.pdf	Competitor census — 265 ads → 61 concepts, avatar map, funnel-stage sort, the tired-mom 6-ad model set with copy + Ad Library links.
nutrops-swipe-file-by-stage.pdf	Day-one creative kit — static + video options per stage with copy, links, rebuild notes, Fairy Flame rewrites.
fairy-flame-lander-blueprint.pdf	Modular matched-page system + split-test roadmap.
<code>avatars/research.md</code> + 4 avatar pitches	Full VoC research, ranked segments, Kindergarten-simple pitch per avatar.
<code>angles/burned-out-mom-angles.md</code>	16 candidate angles → top 10, grouped by spokesperson.
<code>scripts/00-angle-matching.md</code> + <code>01-10</code>	Angle→formula matching + the 10 approved VSL scripts.
<code>ads/batch-01-copy-bank.md</code>	8 PT + 15 HL + 3 descriptions, VSL pairings, AS-1/2/3 test structure.
<code>ads/naming-and-utm-spec.md</code>	Naming taxonomy + Triple Whale UTM setup.
<code>offer.md</code> · <code>stories/founder-story.md</code>	Single-source offer doc + the true founder origin story (Script 04/09).

13 · Your first week

- Read this dossier + `offer.md` + `avatars/research.md` ; skim the reference PDFs.
- Get Meta ad account access on a **clean/fresh business asset**; confirm verification + supplement-category eligibility.
- **Tracking:** Meta pixel + Triple Pixel live on liitt.co; Meta connected in TW; one test click resolves. Don't scale until green.
- Set up campaign shell `FF_PUR_T0F_2026-08_v1` + naming taxonomy + TW UTM string.
- Build the **6 Phase-0 statics** from the swipe file, rewritten to our voice within the compliance rules.
- Confirm the matched page (or interim PDP) is live on liitt.co.
- Launch Phase 0 at a test budget; set kill/scale windows first.
- Stand up reporting (CPA / AOV / MER / hook-rate) + a daily check-in; sync on VSL delivery dates for Phase 1.

Get from the team: clean ad-account/domain setup, final upsell pricing (placeholder), and matched-page go-live date. **The compliance discipline is the whole game this time** — keeping the account alive is what lets everything else compound.

Prepared for media-buyer onboarding, 2026-08-18. Channel scope: Meta only (TikTok Shop/affiliate flywheel is context, not this role). Sources: products/fairy-flame/ (offer.md, manifest.json, avatars/, angles/, scripts/, ads/, stories/) and the Nütrops competitor research. Compliance/proof constraints per offer.md respected throughout: functional-mushroom positioning, symptom language only, only Jordan T. & Maya S. testimonials usable, review counts/ratings excluded until real data exists. Figures are current targets, not actuals; upsell prices placeholder.
